

DTGB - 95.1-2-4-11

Calories discharger

→ CARLYCOOL

04/11

For maximum protection of heat sensitive equipment during brazing or soldering operations.

■ Applications

- CARLYCOOL is a calories discharger: it is applied on zones that present a risk of degradation during temperature increases (nearby surfaces, walls, piping, line components, etc...) before the brazing or soldering operations.
- Thanks to its chemical composition, CARLYCOOL can eliminate most of the emitted calories and ensures an efficient protection against the noxious effects of excessive heat.

■ Functional features

- CARLYCOOL has a high calorie dissipating power.
- It does not run and can be used on sloped, vertical or horizontal parts.
- CARLYCOOL is stable at high temperatures.
- It is non toxic for materials, users and the environment.
- Vanilla odour.

■ CARLY advantages

- CARLYCOOL is a translucent gel that does not mask the work surfaces.
- Avoids having to remove the heat sensitive parts to be soldered.
- Non aggressive for the surfaces on which it is applied (steel, copper, aluminium...).
- Does not stain.
- After use, a simple wiping with a cloth leaves the surfaces clean, after brazing or soldering.

Calories discharger

→ CARLYCOOL

■ Directions for use

- Apply a 5 mm thickness of product on the part to be treated.
- Braze or solder, the product evaporates with the heat.
- If necessary, add more product to ensure maximum heat protection.
- After use, wipe with a clean cloth.

■ Precautions for use

* CARLYCOOL does not contain any hazardous products.

* Do not apply on electrical equipment, whether in operation or not.

* Do not swallow.

* If swallowed, consult a doctor immediately and show the packaging or label.

* S2 Keep away from children.

* S26 In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

* S28 After contact with skin, wash immediately with plenty of soap-suds

* **Storage conditions:** Keep the

product at temperatures between +5°C and +40°C.

* **Reprocessing:** the product should be disposed of in accordance with the legislation in force.
